**Subject: Discussion of Potential Amendments to Supervision Via
Videoconferencing Bill Proposal**

Background

Current law only permits associates to be supervised via videoconferencing if they are working in an exempt setting (a governmental entity, a school, college, or university, or an institution that is nonprofit and charitable). The Board is pursuing a bill proposal to allow supervision via videoconferencing in all settings.

The text of the current proposal, which the Board approved at its November 5, 2021 meeting, is shown **Attachment B** and does the following:

- Clarifies that face-to-face direct supervisor contact means either in-person, or contact via two-way, real time videoconferencing.
- Requires that a supervisor must conduct a meeting with a new supervisee within 60 days of the commencement of any supervision, in all settings.
- Requires that during the meeting, the supervisor must assess the appropriateness of allowing the supervisee to gain experience hours via telehealth, and the appropriateness of the supervisee to receive supervision via videoconferencing. The results of the assessment must be documented.
- Includes a sunset date of January 1, 2025. Unless the sunset date is deleted or extended, nonexempt settings will once again be required to have in-person supervision, as is currently the law. The Telehealth Committee decided to have a sunset date in place in order to balance the need to move forward on this issue, with the need to take more time to consider the implications for various types of settings, and possibly fine-tune the law as needed.

The Board should review the language drafted by Legislative Counsel, shown in **Attachment A**, as it contains wording changes to the language that was originally approved by the Board. Staff believes the wording changes are minor, but not

necessarily nonsubstantive. (For reference, the language originally approved by the Board at its November 5, 2021 meeting is shown in **Attachment B.**)

Potential Amendments to the Bill

The Board now has an author for the bill proposal, and the author is willing to run the proposal as urgency legislation. However, the author's office, as well as the Assembly Business and Professions' committee consultant and Legislative Counsel, have reviewed the bill's language and suggested the Board consider three amendments to the language, as follows).

1. POTENTIAL AMENDMENT #1: Consider clarifying the term "appropriateness" (Suggested by the Author's Office and the Assembly Business and Professions Committee Consultant)

The committee consultant and the author of the bill suggested considering clarifying the term "appropriateness." That term is used in the bill as follows:

[BPC §§4980.43.2, 4996.23.1, 4999.46.2](#)

*(d) (1) Within 60 days of the commencement of supervision, a supervisor shall conduct a meeting with the supervisee during which the supervisor shall assess the **appropriateness** of allowing the supervisee to do both of the following:*

(A) Gain experience hours via telehealth.

(B) Receive supervision via two-way, real-time videoconferencing.

(2) The supervisor shall document the results of the assessment made pursuant to paragraph (1).

To some extent, the "appropriateness" might best be left to the professional judgement of the supervisor. BPC [4980.43.1](#), for example, lists a supervisor's responsibilities, and several of those responsibilities rely on the supervisor using their professional judgement.

However, some additional guidance may be helpful. Two options are as follows (possible amendments shown in red):

OPTION ONE

This option simply defines what appropriateness entails for each activity.

[BPC §§4980.43.2, 4996.23.1, 4999.46.2](#)

*(d) (1) Within 60 days of the commencement of supervision, a supervisor shall conduct a meeting with the supervisee during which the supervisor shall assess the **appropriateness** of allowing the supervisee to do both of the following:*

*(A) Gain experience hours via telehealth. The assessment of appropriateness shall include, but is not limited to, the abilities of the supervisee, the appropriateness of telehealth for the client, the preferences of the client, and the privacy of the distant site and originating site*¹.

(B) Receive supervision via two-way, real-time videoconferencing. This assessment of appropriateness shall include, but is not limited to, the abilities of the supervisee, the preferences of both the supervisee and supervisor, and the privacy of the locations of the supervisee and supervisor while supervision is conducted.

(2) The supervisor shall document the results of the assessment made pursuant to paragraph (1).

OPTION TWO

This option deletes the requirement that within 60 days, the supervisor shall assess the appropriateness of allowing the supervisee to gain experience hours via telehealth. This is based on feedback from stakeholders that defining the appropriateness of this may be premature at this time, as the Telehealth Committee is still exploring appropriate telehealth settings. Moreover, the intent of this bill is to focus on supervision via videoconferencing. A requirement to assess supervisee appropriateness for telehealth could be added into law at a later time if the Telehealth Committee determined, upon the completion of its work, that it is appropriate.

BPC §§4980.43.2, 4996.23.1, 4999.46.2

(d) (1) Within 60 days of the commencement of supervision, a supervisor shall conduct a meeting with the supervisee during which the supervisor shall assess the appropriateness of allowing the supervisee ~~to do both of the following: to receive supervision via two-way, real-time videoconferencing.~~ This assessment of appropriateness shall include, but is not limited to, the abilities of the supervisee, the preferences of both the supervisee and supervisor, and the privacy of the locations of the supervisee and supervisor while supervision is conducted.

~~*(A) Gain experience hours via telehealth.*~~

~~*(B) Receive supervision via two-way, real-time videoconferencing.*~~

(2) The supervisor shall document the results of the assessment made pursuant to paragraph (1).

¹ "Distant site," as defined in BPC [§2290.5](#), is the location of the health care provider while providing telehealth services. "Originating site," as defined in the same statute, is the location of the patient while telehealth is being provided.

2. POTENTIAL AMENDMENT #2: Consider Stating What Happens if the Supervisor’s Assessment Determines that Telehealth and/or Supervision via Videoconferencing is Not Appropriate (Suggested During Discussion with Legislative Counsel)

Legislative Counsel suggested the Board potentially consider what should happen if the supervisor determines supervision via videoconference is not appropriate. This could look something like the following.

(2) The supervisor shall document the results of the assessment made pursuant to paragraph (1), and shall not utilize supervision via two-way, real-time videoconferencing if their assessment finds it is not appropriate.

3. POTENTIAL AMENDMENT #3: Consider extending the January 1, 2025 expiration date by one year (Suggested by the Assembly Business and Professions Committee Consultant)

The committee consultant noted that the Board’s next sunset date is January 1, 2026. If the Board extended the expiration date in the bill from January 1, 2025 to January 1, 2026, then the expiration date would coincide with the sunset date. Any extension or fine-tuning of the law could then potentially be discussed and included as part of the Board’s next sunset bill.

Recommendation

- Conduct an open discussion about the language drafted by Legislative Counsel shown in **Attachment A**, and determine if the Board approves of that language, as drafted. (For reference, the original Board-approved language is shown in **Attachment B**.)
- Discuss if the Board wishes to make any of the potential amendments discussed above to the language in **Attachment A**. Direct staff to make any discussed changes and any non-substantive changes, and make the amendments to the bill.

ASSEMBLY BILL

No. 1758

Introduced by Assembly Member Aguiar-Curry

February 2, 2022

An act to amend, repeal, and add Sections 4980.43.2, 4996.23.1, and 4999.46.2 of the Business and Professions Code, relating to healing arts, and declaring the urgency thereof, to take effect immediately.

legislative counsel's digest

AB 1758, as introduced, Aguiar-Curry. Board of Behavioral Sciences: marriage and family therapists: clinical social workers: professional clinical counselors: supervision of applicants for licensure via videoconferencing.

Existing law establishes the Board of Behavioral Sciences within the Department of Consumer Affairs, and requires the board to regulate various registrants and licensees under the Licensed Marriage and Family Therapist Act, the Clinical Social Worker Practice Act, and the Licensed Professional Clinical Counselor Act. A violation of any of those acts is a misdemeanor.

Under those acts, applicants for licensure are required to comply with specified educational and experience requirements, including, but not limited to, hours of supervised experience and direct supervisor contact. Existing law defines “one hour of direct supervisor contact” for purposes of those acts to mean one hour of face-to-face contact between the supervisor and the supervisee or supervisees, as specified. Existing law authorizes a supervisee working in certain exempt settings to obtain the required weekly direct supervisor contact via 2-way, real-time videoconferencing.

This bill, instead, would define “face-to-face contact” for purposes of the definition of “one hour of direct supervisor contact” to mean in-person contact, contact via 2-way, real-time videoconferencing, or some combination of these. The bill would make the supervisor responsible for ensuring compliance with federal and state laws relating to confidentiality of patient health information. The bill would require a supervisor within 60 days of the commencement of supervision to conduct a meeting with the supervisee during which the supervisor is required to assess the appropriateness of allowing the supervisee to gain experience hours via telehealth and to receive supervision via 2-way, real-time videoconferencing. The bill would require the supervisor to document the results of that assessment. Because the bill would expand the scope of a crime, the bill would impose a state-mandated local program. The bill would repeal its provisions on January 1, 2025.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Vote: 2/3. Appropriation: no. Fiscal committee: yes.

State-mandated local program: yes.

The people of the State of California do enact as follows:
